Hi Katie

Thank you for your email. The JTA scheme utilises peer-to-peer engagement to promote road safety and active travel within the school community. We have conducted the first 'hands up' pupil survey to record both current and preferred modes of transport to school. I believe this will become our baseline to determine any modal shift to a higher uptake of active and sustainable modes of transport as the school travel plan coalesces via the modeshift portal.

Kind regards

Alex

Hi Alex,

Hope all is well. We had more concerns raised about speeding on Oxford Street through to Wyatt's Lane at our meeting last night which is a concern especially in the vicinity of the school and we would like to review this issue more at our next meeting on 4th November. In preparation for this meeting, would it be possible to have an update on how the JTA scheme is going please?

Many thanks

Katie Riley
